

Restaurant Sales Operations BI Dashboard

Project Overview

Built an interactive Excel dashboard analyzing restaurant sales transactions across 5 product categories, 5 cities, and various purchase channels spanning a 2-month time period.

KPIs Developed:

- Total Revenue
- Total Orders
- Average Order Value
- Top Performing City
- Top Product

Key Insights:

- Lisbon generated highest revenue
- Burgers had strongest sales performance
- Online purchases were strongest, representing 40% of revenue
- Peak sales occurred in mid-November

Tools Used:

- Excel
- PivotTables
- Data Cleaning
- Data Visualization (PivotCharts, Slicers)
